Honoring the Tuskegee Airmen
and the women who provided support.

- ◆ The Alzheimer's Association, Black American West Museum and the Tuskegee Airmen, Inc., Hubert L. "Hooks" Jones Chapter are showing our commitment to the community by providing information and support for all those affected by Alzheimer's in the African-American community.
- ◆ African-Americans have a higher rate of vascular disease, including heart attack and stroke. By working together, we hope to reduce these risk factors and reverse the growing trend of Alzheimer's disease among African-Americans.

Presented in partnership by

alzheimer's 
association
